

6 Reasons why we need our daily doses of Bettalife Aloe Vera Drinking Gel:

Skin cancer is on the rise due to ozone depletion & weather changes as the body does its best to combat these free radicals.

When your body lacks the ammunition to fight cancer cells, it is at their mercy.

Increase consumption of genetically modified foods adds more stress to our body.

Bettalife Aloe Vera Drinking gel can supply the vital nutrients for your body for combat

Polluted toxic air means our body have to work harder to clear these pollutants from our respiratory system & organs.

Failing which, death can occur. Our little ones are very vulnerable...

Toxins build-up in your body due to lack of exercise; thus your liver & kidneys have to work harder to eliminate these free radicals.

Bettalife Aloe Vera Drinking Gel & its complementary products can help to detox, rejuvenate, soothe & heal, rebuild tissues, reduce weight & water retention issues

Water is essential for human survival. Due to water shortage, we need to use recycled water for human consumption. As such our body needs to do more work to clean, store & use this water for our bodily functions.

By supplementing it with aloe vera drinking gel, we can add more nutrients to help it does its job better.

An overworked or stressed body needs to boost its immunity or else it is easy to succumb to illnesses & diseases.

Stress is the cause of numerous cancers and degenerating diseases. Compare 1 person with complete & balanced nutrition & healthier lifestyle than 1 without, the chance of the 2nd person contracting life threatening illnesses is much higher.
